Parking Cost Reduction for Students on Co-op in Locations and/or on Shifts That Make Having a Car a Necessity

In order to assist students interested in co-op positions that, because of location or non-standard business hours, or both, make availability of a personal vehicle a necessity, Northeastern University will provide a discount of 50% of the on-campus parking fee for the duration of the co-op assignment. This program takes effect for co-op periods beginning on or after July 1st, 2009.

Central Co-op working with Enrollment Management will provide these discounts to each College, which will make the waivers available through the co-op coordinators based on the following criteria:

- The co-op position is in a location, or involves working a shift, or both, that makes availability of a vehicle a necessity.
- The employer does not provide transportation assistance or an additional stipend to cover the cost of transportation to the location.
- The student has not had a car that he or she kept on campus overnight prior to the start of the co-op assignment.

Co-op coordinators who determine that a student is eligible for this discount will forward the name of the student to Co-op Connections. Co-op Connections will notify all eligible students when applications for the upcoming period are available. At that time, students should apply for parking on-line as they normally would. The full price will be charged to his or her account, but an amount equal to 50% of the parking fee will be credited to the account within two business days.
