To do this you will use InterviewStream (an online tool for interview practice) to record yourself (through a webcam) for a mock interview.

- If you have a webcam and a block of time where you know you won't be disturbed, this can be done at home. If you do not have one, book an appointment online through the Career Services website (see below).
- You should dress up and do your best! (treat this as a real interview so you can really learn from it)
- Choose a company or job to interview for – it will give you focus

1) Record your Interview

How to Use InterviewStream:

Step One: Getting Started
Use your own computer and webcam or make an appointment online to use the camera in Career Services. Just go to careerservices.neu.edu, choose “Career Tools” in the “Student Tools” box, then click on the InterviewStream icon, create an account, and do a mock interview.

Step Two: Select Interview Questions
Choose your own questions from more than 1,000 options or use the preselected set of common interview questions.

Step Three: Record Your Interview
A virtual interviewer will come on screen and ask the questions selected, and each response will be recorded. You will have two minutes to answer the question. You can view each response and redo the answer as many times as you like.

Step Four: Upload & Share Interview
Your interview will automatically upload to the InterviewStream servers, and you will be emailed a link that connects you to a video of your interview. You can send this link to a career counselor or other advisor and ask for their feedback.
